Frage markieren

The cycle plot is used to

Verbleibende Zeit 0:38:05

Wählen Sie eine oder mehrere Antworten:

- a. indicate correlation between multiple dimensions
- b. visualize and compare spatial data
- c. identify the periodic pattern and the trend in individual groups
- d. visualize periodic time series
- e. compare data points within the same periodic group

Frage 15

Antwort gespeichert

Erreichbare Punkte: 3,00

Frage markieren

When showing data about thousands of people traveling between a few regions, which of the approaches can provide meaningful insights on the data:

Wählen Sie eine oder mehrere Antworten:

- a. two pie charts, one representing regions by the amount of exits, and one by the amount of arrivals
- b. two world maps, one representing the exit regions, another representing the arrival regions, and arrows between them representing each person's trajectory
- c. two maps showing only the relevant regions, with regions colored using a color scale according to amount of people exiting, and arriving, respectively
- d. a world map with many arrows over the regions, each arrow connecting the exit and arrival region of an individual person
- e. a matrix where each line,row represents leaving->arriving, so that each index of the matrix contains the count of people moving in that direction, and color-coded so that the larger the value in the matrix, the more intense the color

Frage 16

Which of the following statements about visual variables are true?

Wählen Sie eine oder mehrere Antworten:

a.

The ranking of visual variables is equally valid for different types of data (quantitative-ordinal-qualitative).

b.

Color hue is well-suited for quantitative data.

c.

Area is a better choice than length for encoding quantitative data.

d.

Position is most accurately perceived.

e.

Color hue is well-suited for qualitative data.

Understanding how bar chart works, the following can be said to be true:

Wählen Sie eine oder mehrere Antworten:

- a.
the ordering of the bars has no effect on the readability of the graph
- b.
when representing an average as a bar, an extra line spawning from the top of the bar can be used to also encode the variance
- c.
other shapes can be used to display the same information, and even drawings of objects, as long as they do not distort the understanding of the data
- d.
when visualizing a small data series with no temporal aspect, a bar chart can be used instead of a line chart since the points don't need to be connected
- e.
when representing an average as a bar, the width of the bar can be used to also encode the variance

Frage text

When showing data about thousands of people traveling between a few regions, which of the approaches can provide meaningful insights on the data:
Wählen Sie eine oder mehrere Antworten:

a.

two pie charts, one representing regions by the amount of exits, and one by the amount of arrivals

b.

two world maps, one representing the exit regions, another representing the arrival regions, and arrows between them representing each person's trajectory

c.

two maps showing only the relevant regions, with regions colored using a color scale according to amount of people exiting, and arriving, respectively

d.

a world map with many arrows over the regions, each arrow connecting the exit and arrival region of an individual person

e.

a matrix where each line, row represents leaving->arriving, so that each index of the matrix contains the count of people moving in that direction, and color-coded so that the larger the value in the matrix, the more intense the color

Information Visualization can be defined as: "**the process of transforming data, information, and knowledge into visual form**".

Given this definition, select the correct statements

Wählen Sie eine oder mehrere Antworten:

a.

Knowledge are measurements with an associated meaning.

b.

Data are input signals to sensory and cognitive processes

c.

Knowledge are facts and statistics collected together for analysis.

d.

Knowledge comprises data, information and the cognitive machinery needed to take decisions.
